CTO's Desk

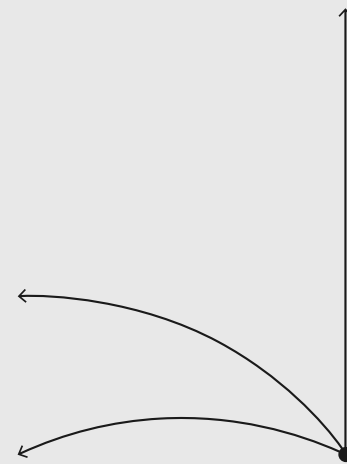

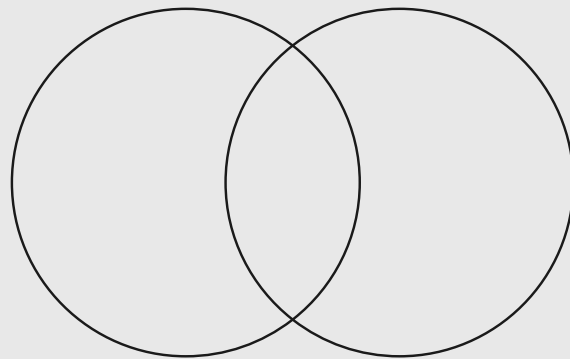

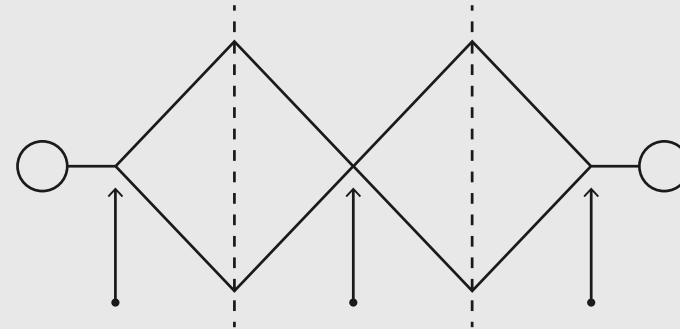

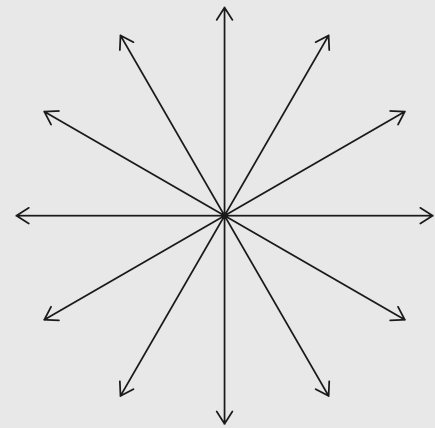

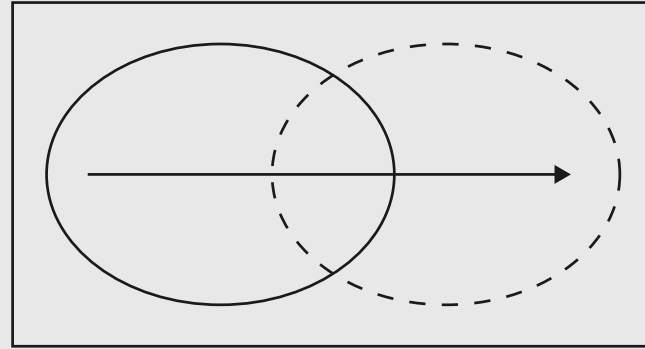

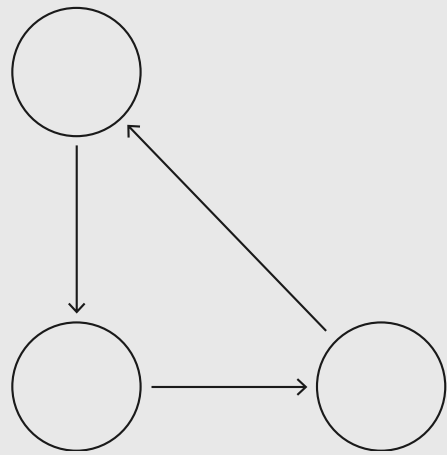

"Technological Intelligence is the new way to solve problems".

At iView Labs, we bring solutions with 3 approaches, problem interpretation, user innovation and solving which derives the customer value. As businesses today are dilating for disruption they need digital innovation keeps up to changing needs of consumers. Technology ubiquity is seen across enterprises and customers. Exponential and cognitive technologies such as AR [Augmented Reality], VR [Virtual Reality], machine learning and Natural Language Processing in enterprise solutions will narrow down this gap between businesses, machines and consumers. At View Labs, we aim to build the future of IT solutions in a fresh way by creating culture of innovation. We have a great team of engineers, designers and thinkers who are ready to take up new challenges to build successful products. We are here to empower enterprises with technological intelligence to help them to change the world around them.
